

Security Alerts

Security alerts notify you when certain activities take place on your SCU Online account. You can set up alerts to notify you when:

- A computer/browser is successfully registered
- An invalid password attempt is made
- A new user is created
- A change is made to your user profile
- And more

Note: For your protection, you will always be alerted when your login ID or password is changed.

To set up a Security Alert, follow these short steps:

- 1) Click Alerts under Settings in the navigation menu.
- 2) Click on the “Security Alerts” accordion to show all the alert options.

Create and manage alerts for your accounts. Enable/disable security alerts for account activity and edit delivery preferences for receiving alerts. X
